

Rafael Figueiredo

Senior Software Engineer

PROFESSIONAL EXPERIENCE

Senior Software Engineer Oct 2025 – Present
Motorola Solutions

- Build mission-critical cloud software across backend services, frontend applications, infrastructure, and delivery pipelines.
- Turn complex product requirements into maintainable production features with clear ownership from implementation to release.
- Work across services and user-facing surfaces where reliability, traceability, and clean delivery matter.

Software Engineer Apr 2024 – Sep 2025
Motorola Solutions

- Delivered safety and security product features across services, frontend applications, data flows, infrastructure, CI/CD, and automated testing.
- Improved product workflows by translating requirements into tested, maintainable changes and supporting them through delivery.

Software Engineer Oct 2022 – Mar 2024
VoiceInteraction

- Designed backend and integration features for Audimus.Media, Audimus.Server, and internal speech recognition products.
- Improved service interaction, backend maintainability, and support tooling for speech recognition workflows.

Earlier Experience 2019 – 2022
Teaching Assistant for Artificial Intelligence at *Instituto Superior Técnico*; researcher for the *SureThing project*; service virtualization trainee at *Link Consulting*.

SKILLS

Programming	Java, Python, TypeScript, JavaScript, Bash, C#, C
Frontend & Frameworks	React, Angular, Vue, React Native, Single-Spa, Module Federation
Backend & Messaging	Spring Boot, gRPC, Express.js, Flask, REST APIs, Microservices, Pub/Sub, Apache Pulsar, Kafka, WebSockets, Webhooks
Platform	Azure, AWS, AWS Tools, Kubernetes, Docker, Helm, Terraform
Data & Observability	PostgreSQL, MongoDB, Elastic, Kibana, Prometheus, Grafana
Delivery	GitHub Actions, Azure Pipelines, Jenkins, Maven, NPM, Artifactory, AI Coding Tools, Prompt Engineering
Testing	JUnit, Cypress, Mocha, Mockito, Testcontainers

PROFILE

Senior Software Engineer building cloud products across backend services, frontend applications, infrastructure, and CI/CD. Strong at turning complex product needs into reliable, shippable systems with clear ownership from implementation to production delivery.

IMPACT

- Deliver across frontend, backend, cloud infrastructure, automated pipelines, and production support.
- Build maintainable systems for safety, security, and speech recognition products.
- Comfortable joining complex codebases, understanding product constraints, and shipping practical improvements.

EDUCATION

MSc Computer Science & Engineering

2020 – 2022 | 18/20
Instituto Superior Técnico

- Specialized in Distributed Systems and Cyber Security.
- Thesis: SureRepute: Reputation System for Location Proof Witnesses.
- Strengthened research-driven engineering through technical evaluation, written communication, and trade-off analysis.

BSc Computer Science & Engineering

2017 – 2020 | 17/20
Instituto Superior Técnico

- Built a strong foundation in algorithms, data structures, databases, computer networks, operating systems, and software engineering.
- Delivered academic projects across web development, distributed computing, cybersecurity, and data-driven systems.

LANGUAGES

Portuguese, English
